

ALL CHILDREN IN SCHOOL BY 2015

Global Initiative on Out-of-School Children

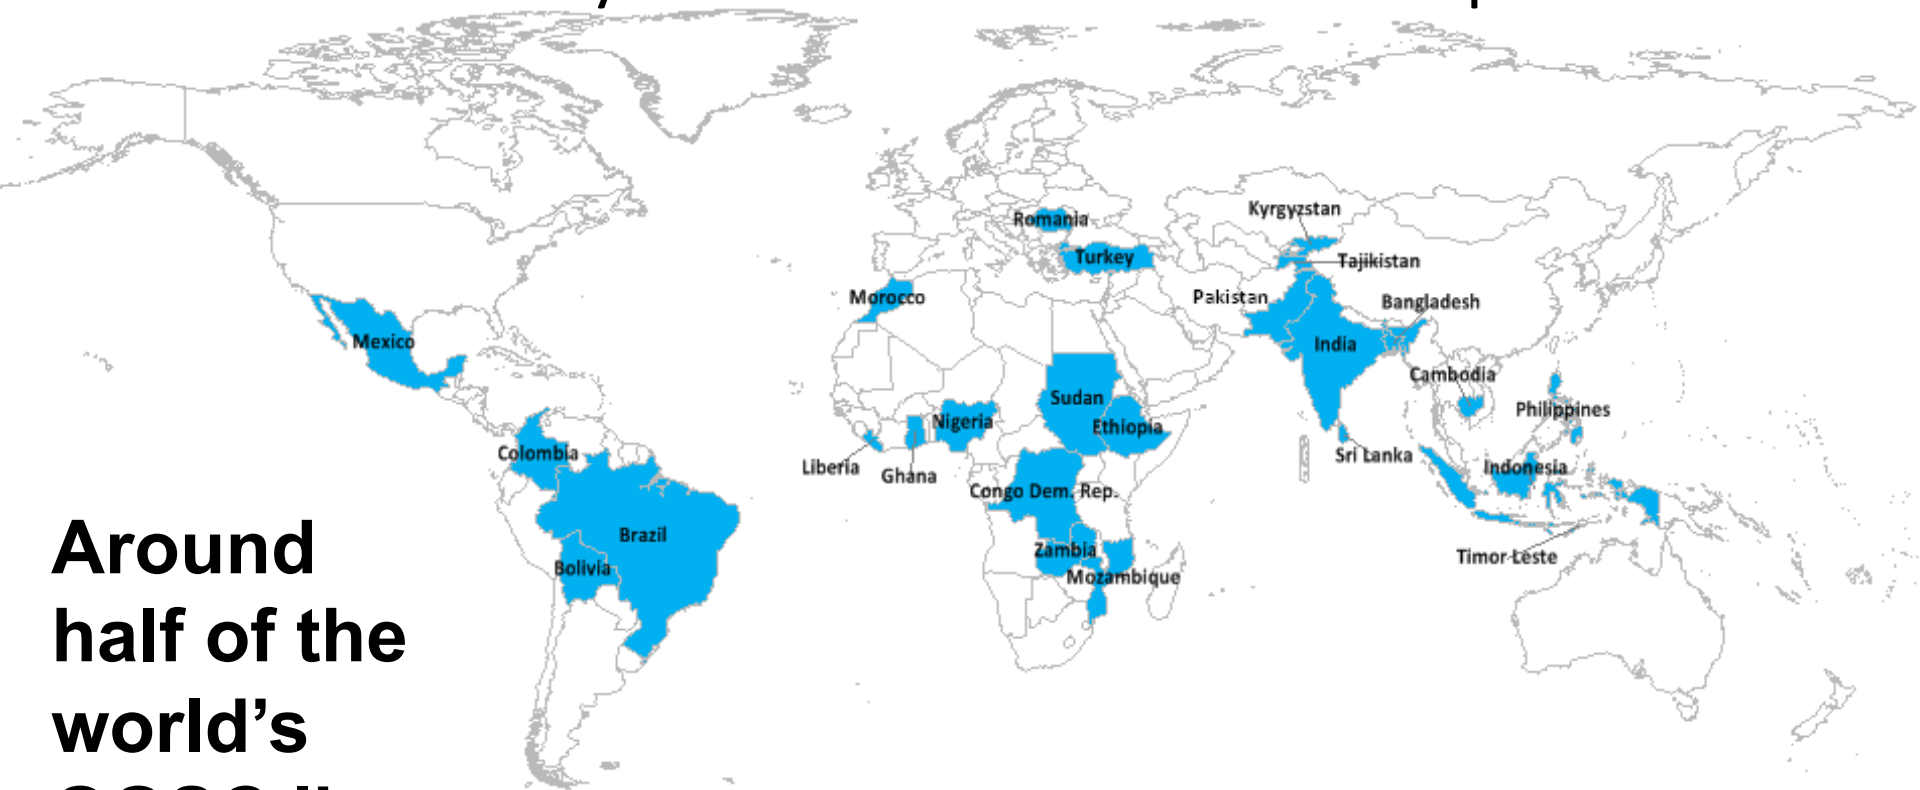

UNICEF and the UNESCO
Institute for Statistics

Regional Ministerial Education Conference
Istanbul, 10-13 December 2013

What is the Out of School Children Initiative?

Overall objective: To reduce the number of out of school children by addressing gaps in data collection, analysis and policy on out of school children

- Coordinated by UNICEF and UIS with other partners

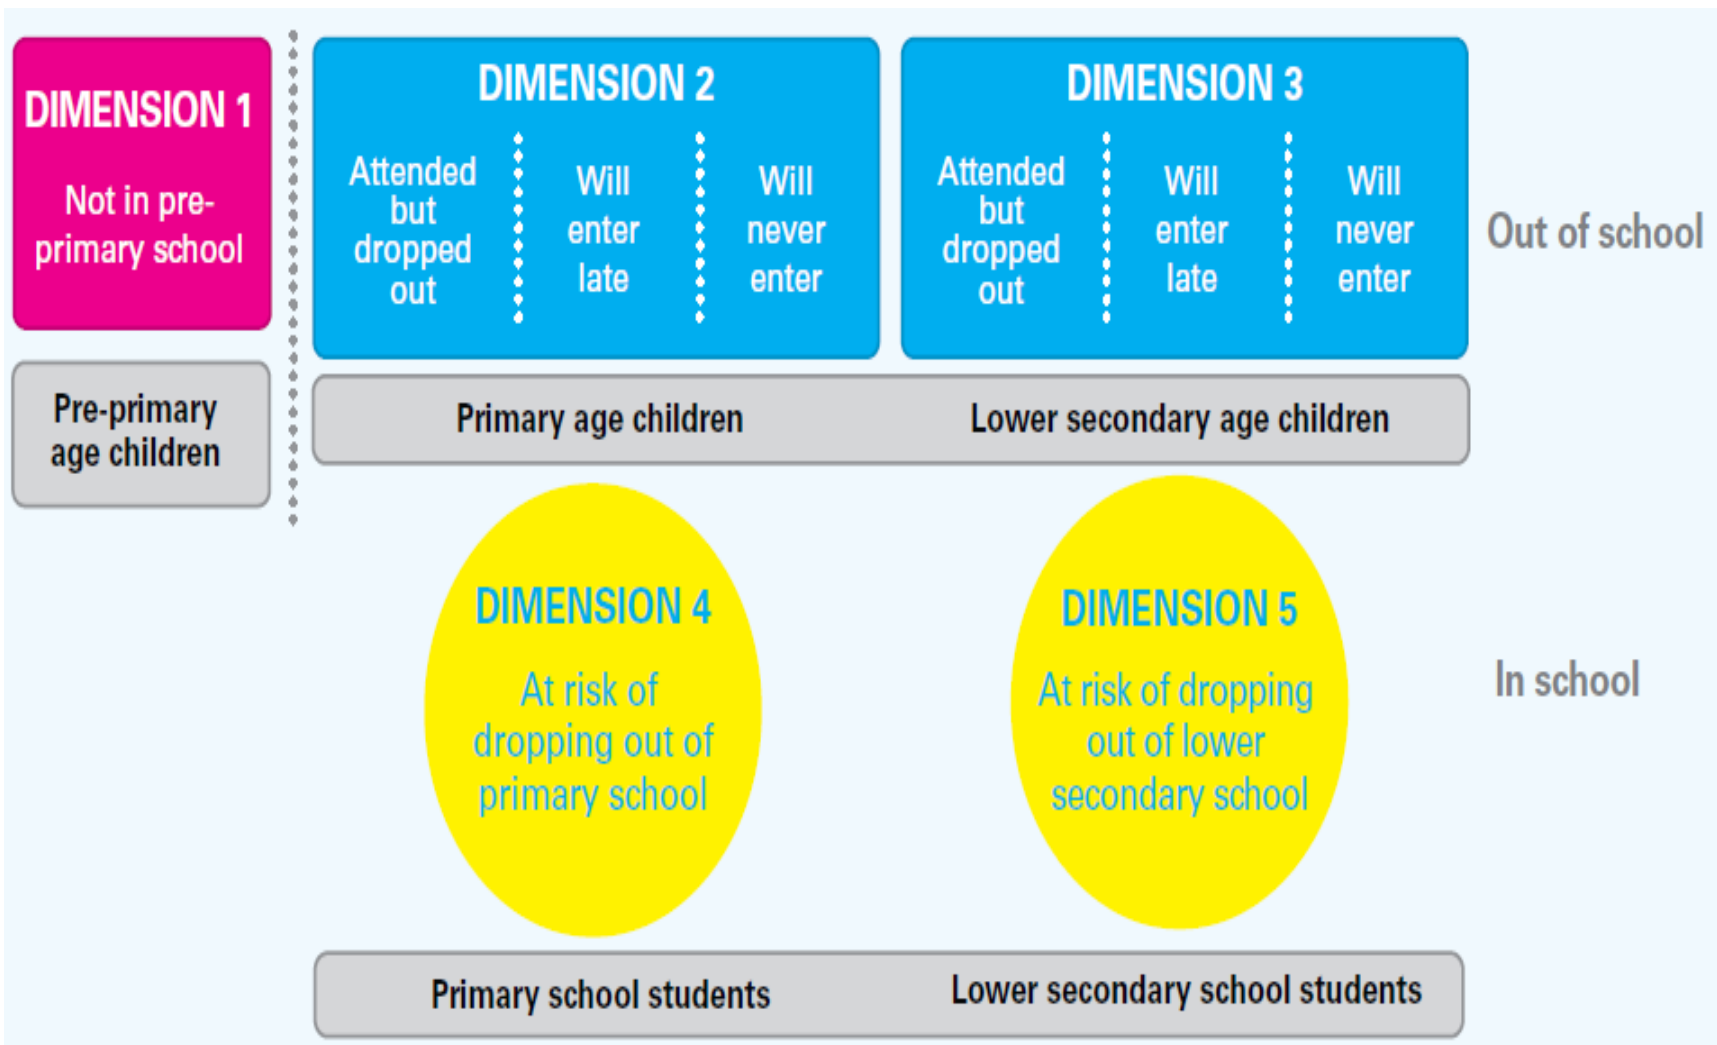

**Around
half of the
world's
OOSC live**

Three core objectives

1. **Data**: Develop comprehensive profiles of excluded children drawing on a range of data sources using innovative measurement approaches
2. **Analysis of barriers**: Link quantitative data with the socio-cultural barriers and resource-based bottlenecks that create exclusion
3. **Implement policies**: Identify policies which reduce exclusion from education (especially among groups most disadvantaged) from a multi-sectoral approach

The 5 dimensions of exclusion

Outputs and Outcomes of the Initiative

- **Focus on the data**
 - Applying new methodologies
 - Identify and diagnose full range of statistical data
 - Help countries improve data collection and analysis

- **Focus on implementing policies**
 - Documenting how to conduct analysis
 - National capacity development
 - Support policy analysis and policy-making process
